Profesional Summary

I am a skilled network administrator and web developer, recently graduated with a Bachelor's degree in Networking and Telecommunications. During my studies, I gained hands-on experience in database management and web development. I did 10 weeks of internship in my second year at SFR and 16 weeks in my third year at SFR, which allowed me to discover the inner workings of a company and to develop strong collaboration skills with other team members. With a great eye for detail and strong analytical skills, I am eager to bring my expertise to a dynamic team.

Work History

Assistant Network Administrator 04/2024 -07/2024

SFR

The first internship went well at SFR, so they contacted me again the following year for my second internship. This time I was able to continue the activities I was doing the first year, but in autonomy. I was also asked to modernize the network of one of SFR's customers.

Assistant Network Administrator 02/2025 -06/2025

SFR

During my experience at SFR I was able to configure and maintain network equipment such as routers, switches, firewalls, and DNS servers. I was also able to monitor the status of networks or install security software

Skills

Network:

- WAN networking
- LAN networking
- Network support
- Wireless network set up
- Network installation
- VPN management
