PROFESSIONAL SUMMARY

As a recent graduate who completed an apprenticeship position within a cybersecurity company, I gained valuable technical experience. I was exposed to various tasks including firewall configuration, vulnerability management, network security monitoring, incident response, and identity and access management. During this professional experience, I also had the opportunity to work on large-scale cybersecurity projects, which provided me with practical experience in analyzing system security. Additionally, I pursued studies in networks and telecommunications at my IUT, which gave me a broader understanding of information system security issues. Overall, this company experience and my studies at the IUT allowed me to gain valuable skills in the cybersecurity field, providing me with a strong foundation to pursue my career in this constantly evolving field.

SKILLS

Programming of switches and routers as well as networking of servers and workstations

Operating systems: Linux, Windows
Programming: Python, Bash, SQL,
Assembly

EXPERIENCE

24-month Internship in a company, Security & Co., Jan 2022 - Aug 2023, Montpellier
Throughout this internship, I discovered the working world, but I also learned about new technologies such as Windows or network architecture.

Hackathon Beziers (Innovation Prize), University, Mar 2023 - Apr 2023, Beziers
This event allowed me to discover the work in a company. I learned how to write technical documentation for the implementation of a company network as well as to respect deadlines.

Supermarket versatile employee, Intermarché, Jun 2022 - Aug 2022, Aups
Throughout this first experience, I learned about teamwork, following my supervisor's directives and also taking initiatives.

Internship in a company, EDF, Dec 2019 - Jan 2020, Beziers
Internship at the EDF Sainte-Croix dam. Throughout this internship, I discovered the functioning of a large company such as EDF, as well as the rigor necessary for the operation of a dam.
